Good morning Andrew,

Rick is out of the office this week and I am tied up with ELMS training for much of the day, but I can forward you some background information on progress to date and ongoing activities for the Chemours Washington Works facility by sometime tomorrow. Hope this works for you. Thanks.

Roger

Rick and Roger,

I'm finally getting back to responding to the internal comments on the Galloway et al. GenX in the Parkersburg area paper.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

As we've discussed, these reports are not well publicized, and I don't really know where to access them.

I'd be very happy to include this information in the paper and I'm wondering if you could point me to a referenceable source that I can use to summarize all the work that has been accomplished so far. Or even better, would either of you be able to provide a terse referenced statement that covers the main points that you think need to be included? A short paragraph that describes the scope of the ongoing efforts to locate PFOA and HFPO-DA contamination of drinking water sources and possibly a statement on effectiveness of the treatment systems that have been installed would be helpful.

We should acknowledge and recount the progress that has been made in these communities.

Thank you very much,

Andy
